HERE FOR OUR COMMUNITY

During these challenging times we have developed a program to serve: The YMCA of Greater Springfield is working to ensure you have access to the programs you need. Our programs are and have always been designed with the health and safety of everyone in mind. In fact, "safety" is our rule number one. All camp staff are CPR and First Aid certified and each program has a trained full-time health administrator on duty all day. Our "on call" Pediatric Doctor is available ensure that our medical services are complete and wrap around. Our camps must and do comply with regulations of the Massachusetts Department of Public health and be licensed by the local board of health.

HEALTH & SAFETY

New health and safety policies have been added to our existing policies to improve our program environment. these include: New 1 to 6 group sizes (buses 1 child to a seat), additional bathrooms and hand-wash stations, staff face masks, temperature checks, hand sanitizing stations, increased hand-washing routines, curbside pickup and drop off only and social distancing rules for all. Weekly professional cleanings (all locations) and staff and campers will only be allowed into programs.

WELL-BEING

Our goal this summer is to provide a safe, healthy space where children are free to let their imaginations run wild. Children's social and emotional well-being can be compromised with closed schools, social isolation, food scarcity, anxiety, uncertainty and parental unemployment, the global pandemic has also destabilized kids' support system. We are taking steps to build in social and emotional support from qualified healthcare professionals to help deal with some of uncertainty and provide children with an environment your child can trust.

ENGAGEMENT (FUN)

FUN and PLAY are how kids learn and camp would not be camp without it! Being creative is the key here; we've packed all the large group fun into small groups which means campers have a more personalized experience with their friends and counselors. Smaller groups in the pool and more swim time! Your child will benefit from highly trained individual counselors that will make each and every activity at camp a unique and fun experience like never before!

VIOLATION OF POLICIES (SUBJECT TO CHANGE)

IMPORTANT: Given the current global pandemic we must do our very best to ensure that everyone is kept safe. We need you, parents, families, and caregivers to do your part to help us maintain that environment. We fully expect everyone to follow our camp policies, violations of our policy will result in strict responsive measures beginning with suspension from programs and facilities and up to termination, no-trespass and legal action. Please familiarize yourself without the below policy and the parent handbook.

MENINGOCOCCAL DISEASE AND CAMP ATTENDEES: COMMONLY ASKED QUESTIONS

WHAT IS MENINGOCOCCAL DISEASE?

Meningococcal disease is caused by infection with bacteria called *Neisseria meningitidis*. These bacteria can infect the tissue (the "meninges") that surrounds the brain and spinal cord and cause meningitis, or they may infect the blood or other organs of the body. Symptoms of meningococcal disease can include fever, severe and constant headache, stiff neck or neck pain, nausea and vomiting, and rash. In the US, about 350-550 people get meningococcal disease each year and 10-15% die despite receiving antibiotic treatment. Of those who survive, about 10-20% may lose limbs, become hard of hearing or deaf, have problems with their nervous system, including long term neurologic problems, or have seizures or strokes.

HOW IS MENINGOCOCCAL DISEASE SPREAD?

These bacteria are passed from person-to-person through saliva (spit). You must be in close contact with an infected person's saliva in order for the bacteria to spread. Close contact includes activities such as kissing, sharing water bottles, sharing eating/drinking utensils or sharing cigarettes with someone who is infected; or being within 3-6 feet of someone who is infected and is coughing and sneezing.

WHO IS MOST AT RISK FOR GETTING MENINGOCOCCAL DISEASE?

People who travel to certain parts of the world where the disease is very common, microbiologists, people with HIV infection and those exposed to meningococcal disease during an outbreak are at risk for meningococcal disease. Children and adults with damaged or removed spleens or persistent complement component deficiency (an inherited immune disorder) are at risk. Adolescents, and people who live in certain settings such as college freshmen living in dormitories and military recruits are at greater risk of disease from some of the serotypes.

ARE CAMP ATTENDEES AT INCREASED RISK FOR MENINGOCOCCAL DISEASE?

Children attending day or residential camps are **not** considered to be at an increased risk for meningococcal disease because of their participation.

IS THERE A VACCINE AGAINST MENINGOCOCCAL DISEASE?

Yes, there are 2 different meningococcal vaccines. Quadrivalent meningococcal conjugate vaccine (Menactra and Menveo) protects against 4 serotypes (A, C, W and Y) of meningococcal disease. Meningococcal serogroup B vaccine (Bexsero and Trumenba) protects against serogroup B meningococcal disease, for age 10 and older.

SHOULD MY CHILD OR ADOLESCENT RECEIVE MENINGOCOCCAL VACCINE?

That depends. Meningococcal conjugate vaccine (Menactra and Menveo) is routinely recommended at age 11-12 years with a booster at age 16. In addition, this vaccine may be recommended for children with certain high-risk health conditions, such as those described above. Otherwise, meningococcal vaccine is **not** recommended for attendance at camps.

Meningococcal serogroup B vaccine (Bexsero and Trumenba) is recommended for people with certain relatively rare high-risk health conditions (examples: persons with a damaged spleen or whose spleen has been removed, those with persistent complement component deficiency (an inherited disorder), and people who may have been exposed during an outbreak). Adolescents and young adults (16 through 23 years of age) who do not have high risk conditions **may** be vaccinated with a serogroup B meningococcal vaccine,

preferably at 16 through 18 years of age, to provide short term protection for most strains of serogroup B meningococcal disease. Parents of adolescents and children who are at higher risk of infection, because of certain medical conditions or other circumstances, should discuss vaccination with their child's healthcare provider.

HOW CAN I PROTECT MY CHILD OR ADOLESCENT FROM GETTING MENINGOCOCCAL DISEASE?

The best protection against meningococcal disease and many other infectious diseases is thorough and frequent handwashing, respiratory hygiene and cough etiquette. Individuals should:

1. Wash their hands often, especially after using the toilet and before eating or preparing food (hands should be washed with soap and water or an alcohol-based hand gel or rub may be used if hands are not visibly dirty);
2. Cover their nose and mouth with a tissue when coughing or sneezing and discard the tissue in a trash can; or if they don't have a tissue, cough or sneeze into their upper sleeve.
3. Not share food, drinks or eating utensils with other people, especially if they are ill.
4. Contact their healthcare provider immediately if they have symptoms of meningitis.

If your child is exposed to someone with meningococcal disease, antibiotics may be recommended to keep your child from getting sick.

You can obtain more information about meningococcal disease or vaccination from your healthcare provider, your local Board of Health (listed in the phone book under government), or the Massachusetts Department of Public Health Division of Epidemiology and Immunization at (617) 983-6800 or on the MDPH website at www.mass.gov/dph.

REQUIRED IMMUNIZATIONS

Vaccination is critically important to control the spread of vaccine-preventable disease. In 2017, a single case of mumps at a summer camp in Massachusetts resulted in isolation of ill individuals, vaccination of those without evidence of two doses of MMR vaccine at several camps, and quarantine of those who did not have evidence of immunity to mumps and who could not get vaccinated. International staff and campers with missing or incomplete vaccination records made rapid implementation of disease control measures very challenging. The current increase in measles cases across the country and around the world highlight the need for complete vaccine documentation for campers and staff.

REQUIRED VACCINES:

Minimum Standards for Recreational Camps for Children, 105 CMR 430.152, has been updated. Immunization requirements for children attending camp follow the Massachusetts school immunization requirements, as outlined in the [Massachusetts School Immunization Requirements](#) table. Children should meet the immunization requirements for the grade they will enter in the school year following their camp session. Children attending camp who are not yet school aged should follow the Childcare/Preschool immunization requirements included on the School Immunization Requirements table.

Campers, staff and volunteers who are 18 years of age and older should follow the immunizations outlined in the document, [Adult Occupational Immunizations](#).

The following page includes portions of the Massachusetts School Immunization Requirements table and Adult Occupational Immunizations table relevant for camps.

If you have any questions about vaccines, immunization recommendations, or suspect or confirmed cases of disease, please contact the MDPH Immunization Program at 888-658-2850 or 617-983-6800. Address questions about enforcement with your legal counsel; enforcement of requirements is at the local level.

If parent/guardian cannot be reached, the person listed as the emergency contact will be called. In an emergency when a guardian cannot be contacted and further medical attention is necessary, the camper will be transported to Baystate Medical Center by ambulance. In the case of an injury which requires immediate medical treatment the following steps will be taken:

1. An ambulance will be called.
2. Parent/Guardian will be notified.
3. A staff member will accompany the child to the hospital.
4. YMCA staff will remain with the child until a parent/guardian arrives.

- All campers and staff must remain seated while the bus is in motion.
- Campers and staff will keep aisles clear for safe passage.

- No gum, food, or drink will be consumed on the bus. Also, pens and pencils should not be used during any bus ride.

If you are on foot, please proceed to the designated area for pick-up and drop-off respecting social distancing. *(Violating this policy for any reason could result in termination.)*

EARLY PICK UP

The Camp Director should have written notice of any camper who will be picked up early.

Parents/guardians must call the Camp Office to sign out and pick up their camper. The YMCA will release a child only to parents, legal guardians or to person(s) authorized and identified on the Camp Registration Form. Early pick up must also be made by curbside.

In the event a relative or friend not identified on the registration form needs to pick up a child, parents should provide, if possible, advance written notification. If an emergency should arise and an unauthorized person needs to pick up a child, a telephone call from the parent/legal guardian must precede the arrival of the unauthorized person. Identification from this person is required. No child will be released to any individual without proper identification.

LATE FEE POLICY

A \$7.00 fee, per camper, for every 15 minutes past 5:30 pm will be charged for campers not picked up beginning at 5:31pm. Late fees are to be paid by the end of the next business day. Please make every effort to be prompt at pick up times. Late pick-ups cause undue stress to a child who may be hungry and tired from a full day at camp. Excessive late pick ups may result in termination of services.

We ask that if there is an emergency, and you know that you are going to be late, please call the YMCA Youth Department at (413) 739-6955. Calling in advance does not exempt a late fee being applied to the account.

YMCA PLAN FOR BEHAVIORAL MANAGEMENT

DISCIPLINE and GUIDANCE shall be:

1. Consistent & based on an understanding of the individual needs and the level of development of each child.

The goal of all discipline is to maximize the growth and development of self-discipline, while ensuring the safety of the group. All rules and limits are clearly explained to the children frequently so they will understand and feel secure that the adults in charge care enough to keep them safe. Developmentally appropriate methods of behavior management will be used in dealing with unacceptable behavior. These methods include use of some of the following techniques:

- Distraction
- Redirection
- Gentle reminders
- Offering acceptable choices
- Natural consequences
- Renewal time (time away from the situation to relax and renew self-control).

Renewal time needs to be used with much care and thoughtfulness to prevent it from becoming a punishment or form of reinforcing inappropriate behavior.

YMCA NO TOLERANCE POLICY

To make the camping experience pleasurable for everyone we would like to remind you about our **NO TOLERANCE** policy.

The NO TOLERANCE policy does not allow for physical violence and bad language in Y programs from our participant and parents/guardians.

The consequences will be as follows:

BEHAVIOR MANAGEMENT DOCUMENTATION & CONSEQUENCES

Repeated behavior which threatens the physical and/or emotional safety of the child, other children or staff (i.e.: hitting, biting, verbal assault, kicking, throwing objects, pushing, and temper tantrums) will result in the following:

FIRST OCCURRENCE

An incident report will be completed. Immediate one day suspension or "In House" behavior management (Camp Director's discretion). The child will be asked to sit and discuss what unacceptable behavior he/she demonstrated and why it occurred. With the assistance of a staff person, the camper will list alternate behaviors for possible future situations.

Example: Choices may include loss of privileges at home and at program

SECOND OCCURRENCE

An incident report will be completed. 1-3-day suspension (depending on the severity of the incident) and the parent will be called in for a conference that same day. Previous documentation will be shared - a plan of action with staff, parent, and child will be determined.

THIRD OCCURRENCE

An incident report will be completed. A Suspension for 3 days will occur or Termination depending on the severity of the incident.
